

FABIÁN SÁNCHEZ SALINAS

INFORMATION SYSTEMS ENGINEERING STUDENT

+506 61101461 | fabian.sanchez.salinas@est.una.ac.cr | linkedin.com/in/fabian-sanchez-salinas-270862361/

PROFESSIONAL PROFILE

Fourth-year Information Systems Engineering student with strong engineering discipline, specializing in the design, construction, and optimization of high-performance RESTful APIs under clean architectures and microservices. I prioritize code quality by applying SOLID principles, DRY methodologies, and design patterns to ensure scalable and maintainable systems. Demonstrated capacity in technical leadership under agile methodologies (Scrum), complex problem-solving, and software delivery with strict international documentation and DevOps standards.

EDUCATION & CERTIFICATIONS

- **Bachelor's Degree in Information Systems Engineering** - Universidad Nacional de Costa Rica (UNA). (2021 - Present)
- **Diploma in Computer Applications Programming** - Universidad Nacional de Costa Rica (UNA). (Completed Jun 2026, Graduation Nov 2026)
- **Scrum Fundamentals Certified (SFC)** - SCRUMstudy. (May 2026)

FEATURED PROJECTS & ACADEMIC EXPERIENCE

- **AgroVeterinaria Río Frío (Comprehensive Management System):** Enterprise platform development using Laravel 12 under a Service Layer architecture. Implemented automated testing (PestPHP, Laravel Dusk) and CI/CD pipelines via GitHub Actions. Advanced security management with Role-Based Access Control (RBAC). Orchestrated deployment with Docker (Multi-stage builds) and integrated real-time monitoring system using Prometheus and Grafana.
- **BusGO (Mobility and Digital Payments Platform):** Structured a microservices architecture using Spring Boot and Go, centralized through an API Gateway. Designed an isolated multi-database schema per service in PostgreSQL, utilizing the PostGIS extension for geospatial calculations. Implemented real-time unit tracking via WebSockets and Redis, ticket validation through QR codes, and full ecosystem deployment in Docker.
- **La VuelTica (Gastronomic Application):** Client-server system design under Clean Architecture. Built a REST API in .NET 8 (C#) with MVC pattern and FluentValidation. Integrated PostgreSQL leveraging JSONB types and GiST indexes. Native mobile client in Kotlin with Jetpack Compose and MVVM.
- **University Academic Mentorship:** Mentor for first-year Information Systems Engineering students, facilitating their university integration and providing technical guidance in programming fundamentals.

TECHNICAL SKILLS

- **Backend & Architecture:** .NET (C#), Java (Spring Boot), PHP (Laravel), TypeScript, Node.js, JavaScript, Go. RESTful API Design, Clean Architecture, and Microservices.
- **Databases:** PostgreSQL (PostGIS), SQL Server, MySQL, Redis. Relational modeling, isolated databases per microservice, spatial query optimization (GiST).
- **Frontend & Mobile Development:** Kotlin (Jetpack Compose, MVVM), React Native (Expo), React, Tailwind CSS, Bootstrap.
- **DevOps, Testing & Infrastructure:** Docker (Multi-stage, Compose), CI/CD (GitHub Actions), PestPHP, Laravel Dusk, Prometheus, Grafana, AWS Lambda, Linux.
- **Tools & Security:** Git, GitHub (strict PRs), JWT Bearer Authentication, OAuth, Spatie RBAC, Swagger/OpenAPI, WebSockets.

METHODOLOGIES & COMPETENCIES

- **Agility & Leadership:** Software development lifecycle management with Scrum and Kanban. Practical experience as a Scrum Master facilitating value delivery.
- **Software Quality:** Strict code reviews and application of "English-first" repository guidelines.

LANGUAGES

- **Spanish:** Native. | **English:** Technical B1+ (Reading, writing, and code documentation oriented to international standards).
